

## Distrib - Proof of Delivery

100% validation of your product deliveries

### Features and Benefits

#### Features

- Deliveries are validated through barcode scan at drop
- Each scan is validated against delivery information in the system
- The system alerts when an incorrect stack is unloaded or product is missing
- PDA based software suite, 100% compatible with other Distrib modules

#### Benefits

- Full loading details; amount, SKUs timestamp
- Prevents delivery mistakes
- Track and trace orders to delivery
- Full reconciliation of product shipped v product delivered
- Automatic ETA delivery notification to customer through ASN, EDI or Email
- Eliminates 'Unaccounted For'
