# Distrib - Dock Manager
Control your loading process

Dock Manager provides complete control over the loading docks, no matter the amount of activity going on, or number of trucks being loaded at the same time

The software at the heart of the Dock Manager application is intuitively easy to use. The main screen provides At-a-Glance door and loading progress status.

The intuitively easy to nanigate user interface makes assigning door destination(s), or diagnosing an issue a matter of a simple few clicks. A load manifect is generated automatically when the truck is dispatched.

Be secure in the knowledge of what was loaded and shipped and stay in control throughout with Pcdata's Dock Manager.

Features and Benefits

Features
- Scan of all products loaded into the awaiting trucks
- Each scan validated against delivery confirmation in system
- Instant audio visual feedback on (in) correctness of product load
- Loading details; amount, SKUs, timestamp
- 100% compatible with other Distrib modules

Benefits
- Full traceability of product / orders loaded and shipped
- Prevents truck loading mistakes
- Automatic, accurate load manifest generation
- Full reconciliation of products dispatched v product loaded
- Track and trace product to truck dispatch

Dock Manager - Key System Elements

Key system elements
