DistribXE
by pcdata Logistics Automation

Put-to-Light made easy.

Distrib XE is a self-supporting Put-to-Light solution for up to 50 locations, developed specifically for order filling environments in which products and customers change frequently and quickly.

Uniquely designed, XE is operationalized in 1 day and can be reconfigured even faster. Distrib XE can be set-up completely without an electrical contractor. Thanks to it's clever, modular support system and patched cables Distrib XE can be made operational in a matter of hours.

Distrib XE improves efficiency and order fill accuracy as it replaces the need for order pick sheets and automatically doubles as confirmation of product amounts received for dispatch.

Increase productivity and traceability

Distrib XE records all dispatch transactions, making it easy to accurately establish how and when the orders have been fulfilled and to reconcile against production records. **Distrib XE** uses Put-to-Light, which has proven to be the most productive manual order fulfilment technology for fast moving order environments.

Typical Distrib XE System Configuration

Integrated workstation incl. keyboard and touchscreen

Optional barcode scanner

Sturdy, modular support system, clicks together in 6' sections

Expandable to 70 ft in length.
8' 4" at the bottom of the displays

Put displays click in place. Can be hung on one side or facing both directions.

Weighted base can be bolted to floor for extra stability

2 ft.

8 ft 4 in

Easy hardware installation

Attach the next element to these 3 conicals and make sure to put all locking pins and R-clips in place

Each power cable can only be mounted in its own spot. Connect power and network cables to the powecomm unit.

The LED displays will be installed last. Install each display by slightly turning the connector until it "clicks" in its place.

Ready for operation.

Low IT requirements

Distrib XE was designed to minimize IT requirements to make implementation as easy as possible. Software comes with an installation wizard which guides the operator through the configuration process step by step. No drivers or databases to be installed as set-up.

In the unlikely event of questions, a 24x7 helpline is available for support.
